

TECH REQUIREMENTS:

How much space is required?

The show can be performed just about anywhere during anytime of the year. The animals take up an area roughly 8' by 4'. We like to have a 12' buffer zone between the audience and the animals. If it is a particularly large group, this might need to be bigger. In the hotter months (75°F and warmer) the animals will need to be in some type of shade. In the winter months (50°F and colder), the show will need to be in a temperature-controlled environment. The show can be done inside your home, as well as in a basement or heated garage.
